

REPORT ON EXPLORATION For 2013/14

**New Discoveries in the New England
Fold Belt**

Copper, molybdenum, tungsten & gold

Annual General Meeting
10th November 2014
Sydney NSW

ASX CODE: AHR

Disclaimer

- ▶ The material in the presentation (“material”) is not and does not constitute an offer, invitation or recommendation to subscribe for, or purchase any security in Anchor Resources Limited (“AHR”) nor does it form the basis of any contract or commitment. AHR makes no representation or warranty, express or implied, as to the accuracy, reliability or completeness of this material. AHR, its directors, employees agents and consultants shall have no liability, including liability to any person by reason of negligence or negligent misstatement, for any statements, opinions, information or matters, express or implied, arising out of, contained in or derived from, or for any omissions from this material except liability under statute that cannot be excluded. Statements contained in this material, particularly those regarding possible or assumed future performance, costs, dividends, production levels or rates, prices, resources, reserves or potential growth of AHR, industry growth or other trend projections are, or may be, forward looking statements. Such statements relate to future events and expectations and, as such, involve known and unknown risks and uncertainties. Actual results and developments may differ materially from those expressed or implied by these forward looking statements depending on a variety of factors.
- ▶ The information relating to the Exploration Results and geological interpretation for the Blinks, Birdwood, Bielsdown and Aspiring projects is based on information compiled by Mr Graeme Rabone, MAppSc, FAIG. Mr Rabone is Exploration Manager for Anchor Resources Limited and provides consulting services to Anchor Resources Limited through Graeme Rabone & Associates Pty Ltd. Mr Rabone has sufficient experience relevant to the assessment and of these styles of mineralisation to qualify as a Competent Person as defined by the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves - The JORC Code (2012)”. Mr Rabone consents to the inclusion of the information in the report in the form and context in which it appears.

NEW ENGLAND FOLD BELT

- EXTENDS 1600 KM ALONG AUSTRALIA'S NORTH EAST COAST
- HOSTS MANY LARGE MINERAL DEPOSITS IN QUEENSLAND
- UNDER EXPLORED IN NEW SOUTH WALES
- ANCHOR'S FOCUS IS ON NSW SEGMENT NEW ENGLAND FOLD BELT

ANCHOR'S PROJECTS

- THREE PROJECTS IN NSW PORTION OF NEW ENGLAND FOLD BELT - Blicks, Birdwood & Bielsdown
- ONE PROJECT IN FAR NORTH QUEENSLAND - Aspiring

THREE LARGE PORPHYRY PROSPECTS DISCOVERED IN NEW ENGLAND FOLD BELT DURING 2013/14

BLICKS PROJECT

- Tuting prospect - tungsten & molybdenum
- Liberty prospect - molybdenum & copper

BIRDWOOD PROJECT

- Birdwood North prospect - copper & molybdenum

ANCHOR'S OTHER NEW ENGLAND FOLD BELT PROJECTS & DISCOVERIES

BLICKS PROJECT

- Tyringham - Intrusion-related Gold System

BIELSDOWN PROJECT

- Antimony deposit

BLICKS PROJECT

- HIGH VALUE METALS - copper, molybdenum, tungsten & gold targeted
- TWO EXPLORATION LICENCES ABOUT 90 KM FROM ARMIDALE
- MULTIPLE SYSTEMS DISCOVERED

ADJACENT SYSTEMS

- TYRINGHAM IRGS PROSPECT
- likened to Alaska's Fort Knox Gold Mine
- NAVIN PROSPECT- enigmatic large arsenic-copper anomaly
- TUTING PORPHYRY PROSPECT - tungsten & molybdenum

TYRINGHAM PROSPECT - INTRUSION RELATED GOLD SYSTEM

LARGE TWIN TARGETS

- Defined by soil geochemistry
- Supported by magnetic high
- Gold hosted by granite intrusion at one target and granite inferred at depth at other target below gold in sediments
- Shallow drilling yielding low grade gold mineralisation
- Ready for deep drill testing to about 500 metres to search for higher grade zones

TUTING PROSPECT - PORPHYRY TUNGSTEN-MOLYBDENUM TARGET

VERY LARGE SURFACE FOOTPRINT

- Defined by soil tungsten & molybdenum geochemical anomalies
- Coincident with elongate monzogranite intrusion
- Constrained by structural controls in monzogranite
- Ready for first drill testing to about 150 metres depth

BIRDWOOD PROJECT

- HIGH VALUE METALS - copper, molybdenum, tungsten & gold targeted
- TWO EXPLORATION LICENCES ABOUT 50 KM WEST PORT MACQUARIE
- Anchor has identified a large porphyry target ready for drilling

BIRDWOOD NORTH PROSPECT

COINCIDENT FEATURES FROM PAST EXPLORATION DEFINE TARGETS

- Coincident soil molybdenum and copper geochemical anomalies
- Pronounced sub-circular magnetic “low” coincident with geochemical anomalies
- Inferred pipe-like intrusion at depth

ANCHOR TARGETING LARGE SYSTEMS AT BIRDWOOD

- Anchor's exploration model is for a Northparkes pipe-type porphyry deposit
- Drilling assistance through NSW Government Cooperative Drilling Initiative

13

E26 deposit 34.2 Mt @ 1.5% Cu 0.51g/t Au at start up

Lye, 2006

ASPIRING PROJECT - QUEENSLAND

- Exploration Permit located in Hodgkinson Province, near Chillagoe
- Region has many historic and operating mines
- Fertile for copper, gold and other base metals
- Anchor's exploration has discovered multiple vein type deposits with encouraging gold and copper values
